

Role : .Net Engineer

Band : A1

Designation: Software Engineer

Note: This position is for Office Based Employee, however hybrid and work from home model can be considered on case-to-case basis.

Who we are

Focus Edumatics is a leading ed-tech company that has been offering innovative solutions in the fields of online tutoring and e-learning for more than 15 years. It is a place that creates technology-driven solutions to everyday practical challenges faced in education delivery to improve the teaching-learning process. The company's B2B client base includes universities, publishers, and corporates across the US. Currently, the company caters to 1000 + schools and 300,000 students. We empower individuals to solve, create and deliver adaptable solutions. Here is an opportunity to join our dynamic team and build your dream career.

About the role

In this role, you will apply your analytical and critical thinking mind to analyze business requirements, perform system design, development, unit testing and deployment of web and/or mobile based applications. The development will be based on .NET Core, Web Services, Razor Pages, HTML5, CSS/SCSS, ReactJS, Apache Spark, Kafka, Mule ESB, Redis, PowerBI and cloud technologies like Azure, OCI. Knowledge of relational databases especially Oracle ATP and SQL Server is a must to perform these tasks while knowledge of NOSQL databases would be a plus. Should have basic understanding of Oracle ADW and Golden gate.

We are looking for passionate, creative, analytical, and technically skilled full stack developers who can roll up their sleeves and deliver high-quality solutions in the above-mentioned technologies. You will be expected to create reusable, extensible, flexible, high-performing web and/or mobile applications.

What you will do

- Develop high-quality software based on the technical design provided by team lead
- Adherence with software development processes. Demonstrate problem solving skills, and attention to quality and detail
- Perform code reviews and unit testing, validation, and verification testing of program modules
- Develop well managed, high quality, scalable and reusable code using .NET components, web service API's, database procedures, JavaScript, etc.
- Build automation pipeline (CI/CD) through appropriate tools and scripting
- Debug code, solve incidents and defects. Document unit test plans.
- Adhere to OWASP security standards while coding and regulatory requirements

Who you are

- Experienced Software Developer with 1 to 3 years of total IT experience.

- At least 2 years of development experience with Microsoft technology stack (.Net)
- Good knowledge of software development, agile methodologies, and the following technologies: C#, ASP.NET Core, Web API, HTML/CSS, MVC, WCF, JavaScript, Oracle/SQL Server, AngularJS/ReactJS, Apache Kafka, Mule ESB, Apache Spark, PowerBI, Azure DevOps
- Experience developing highly responsive web and mobile applications (UI/UX) using HTML5/CSS3, W3.CSS, Bootstrap, JavaScript, XML, Xamarin, etc.
- Familiarity with various operating systems (Linux, Mac OS, Windows)
- Hands-on experience in software development and agile methodologies
- Proficiency in relational databases like SQL Server and Oracle. Knowledge of cloud technologies (AWS, Azure, Google cloud), container and virtualization will be a big plus.
- Familiarity with Continuous integration (Azure DevOps /Jenkins/Hudson) and version control (GitHub, SVN). Knowledge of modern frameworks and design patterns, and test automation tools for Unit and Performance testing.
- Experience creating secure RESTful web services in XML and JSON

Additional Skills

- Attention to detail
- Proactive in nature
- Ability to prioritize and work independently and time management in all activities
- Ability to meet deadlines and completing tasks with perfection
- Excellent communication skills to collaborate with various stakeholders
- Good team Player
- Analytical mind with problem-solving aptitude
